

Post-Trial Questionnaire

Complete immediately after this trial, before the next simulation condition is prepared.

Participant: _____ Trial #: _____ Condition (e.g. JFB): _____ World: _____
Date/Time: _____

Circle one number per scale, 1–7, unless noted otherwise. There are no right answers – answer how the trial actually felt.

A. Workload (NASA Task Load Index¹)

1. Mental Demand – How mentally demanding was the task?

Very Low 1 2 3 4 5 6 7 Very High

2. Physical Demand – How physically demanding was the task?

Very Low 1 2 3 4 5 6 7 Very High

3. Temporal Demand – How hurried or rushed was the pace of the task?

Very Low 1 2 3 4 5 6 7 Very High

4. Performance – How successful were you in accomplishing the task?

Perfect 1 2 3 4 5 6 7 Failure

5. Effort – How hard did you have to work to achieve your level of performance?

Very Low 1 2 3 4 5 6 7 Very High

6. Frustration – How insecure, irritated, stressed, or annoyed were you?

Very Low 1 2 3 4 5 6 7 Very High

B. Control, Trust & Comfort²

7. I felt in control of the robot's motion.

Strongly Disagree 1 2 3 4 5 6 7 Strongly Agree

8. I trusted the robot to do what I intended. (leave blank if no assistance was active this trial)

Strongly Disagree 1 2 3 4 5 6 7 Strongly Agree

9. The robot's motion felt smooth and comfortable.

Strongly Disagree 1 2 3 4 5 6 7 Strongly Agree

10. I felt safe during this trial.

Strongly Disagree 1 2 3 4 5 6 7 Strongly Agree

C. Notes

Anything notable about this trial? (optional)

¹Hart & Staveland (1988), *NASA-TLX*; adapted here to a 7-point scale for rapid repeated administration between trials.

²Items adapted from standard HRI trust/control constructs, e.g. Jian, Bisantz & Drury (2000).
